

用户查询

```
graph LR; A[用户查询] --> B[SearXNG (search_backend)]; A --> C[Markdown MCP (Agent 自主调用)]; B --> D[返回: 标题 + URL + 摘要]; C --> E[返回: 完整 Markdown 内容];
```

The diagram illustrates a search process starting from a 'User Query' (用户查询) in a green box. This query branches into two parallel paths. The top path goes through 'SearXNG (search_backend)' in a light blue box to a return result in a light blue box: 'Return: Title + URL + Summary' (返回: 标题 + URL + 摘要). The bottom path goes through 'Markdown MCP (Agent 自主调用)' in a light purple box to a return result in a light purple box: 'Return: Complete Markdown Content' (返回: 完整 Markdown 内容). Arrows indicate the flow from the query to the processing steps and then to the final return results.

SearXNG
(search_backend)

返回:
标题 + URL + 摘要

Markdown MCP
(Agent 自主调用)

返回:
完整 Markdown 内容
